LAMMHULTS - DESIGNER FURNITURE

To find the source of Lammhults highly-respected quality, you need only travel 450 kilometers south of Stockholm to the village of Lammhult, in the heart of Sweden's "kingdom of furniture". There you will find the Lammhults factory, a modern 10,000 square meter facility that also houses the senior management, staff and operations center, along with a showroom display of every Lammhults product.

Within these factory walls, one hundred or so local craftspeople ply the trade of their birthright, bringing Lammhults products to life. Furniture making is an inherited skill in these parts and Lammhults proudly points to the successive generations of workers they employ. Lammhults dedication to quality is further demonstrated by their heavy investment in the tooling required to reproduce their famous designs in mass. While costly, this use of tooling ensures protection against copies, while also ensuring that labour costs remain a more manageable component of final product costs.

Lammhults is a growing company, well-established on a number of markets. The seven most important export markets are Denmark, Germany, Japan, Norway, Netherlands, UK and USA.
