

“The changeover to Jeeves went smoothly, even though we switched systems in the middle of a fiscal year.”

Frödinge Mejeri

MORE EFFICIENT WITH JEEVES

Frödinge Mejeri wanted an ERP system that was simple yet had a wealth of functionality. It was also important to eliminate "islands" that create additional work in programs like Excel and Access. Several adaptations had been made to the system used previously. These proved to be unsustainable. With Jeeves, Frödinge now has a modern ERP system that both increases coordination in the company and is adapted for future expansion.

FAST AND SIMPLE IMPLEMENTATION

"The changeover to Jeeves went smoothly, even though we switched systems in the middle of a fiscal year. We and our partner were well prepared for the change and everything went very well," says Britt Svensson, IT Director at Frödinge Mejeri.

A GROWING SOLUTION

In 2000, production began using Jeeves. The following year, Frödinge also installed an EDI solution for both Swedish and foreign customers. The solution is connected directly to Jeeves, making it both flexible and secure.

In February 2005, a project started with a truck computer solution based on PDAs, truck terminals and traceability, giving the company full insight into where the finished products go.

Frödinge has now begun working to develop a third-party solution that provides complete control of the raw material, from production to finished product.

FLEXIBLE PRODUCTION THROUGH PROCESS DOCUMENTATION

An effective process documentation solution has also been developed. This enables Frödinge to quickly and easily gain access to items such as recipes, documents and tool lists. This increases flexibility in production. All material is gathered to a single location, providing the highest possible degree of security and facilitating updates.

THE PARTNER IS IMPORTANT FOR A SATISFIED USER

"At Frödinge, we are extremely pleased with Jeeves and our partner. The work was carried out in a perfect pace in order to keep business running efficiently, and to make the overall experience as good as possible," says Britt Svensson.

FRÖDINGE MEJERI

- at a glance

Frödinge in brief

Frödinge is a company within the Swedish dairy industry. The cheesecake "ostkaka" is Frödinge's flagship, but a variety of cakes and desserts are also included in their assortment.

The lookout for the perfect "ostkaka" has ancient traditions. The "ostkaka" was the pride of the farmer's wife. Tenderly put into the basket to be savoured at the feast. A more obvious dessert was not to be found in the entire region of Småland, Sweden.
